

TURNING HUMAN SANITARY WASTE INTO FERTILIZER

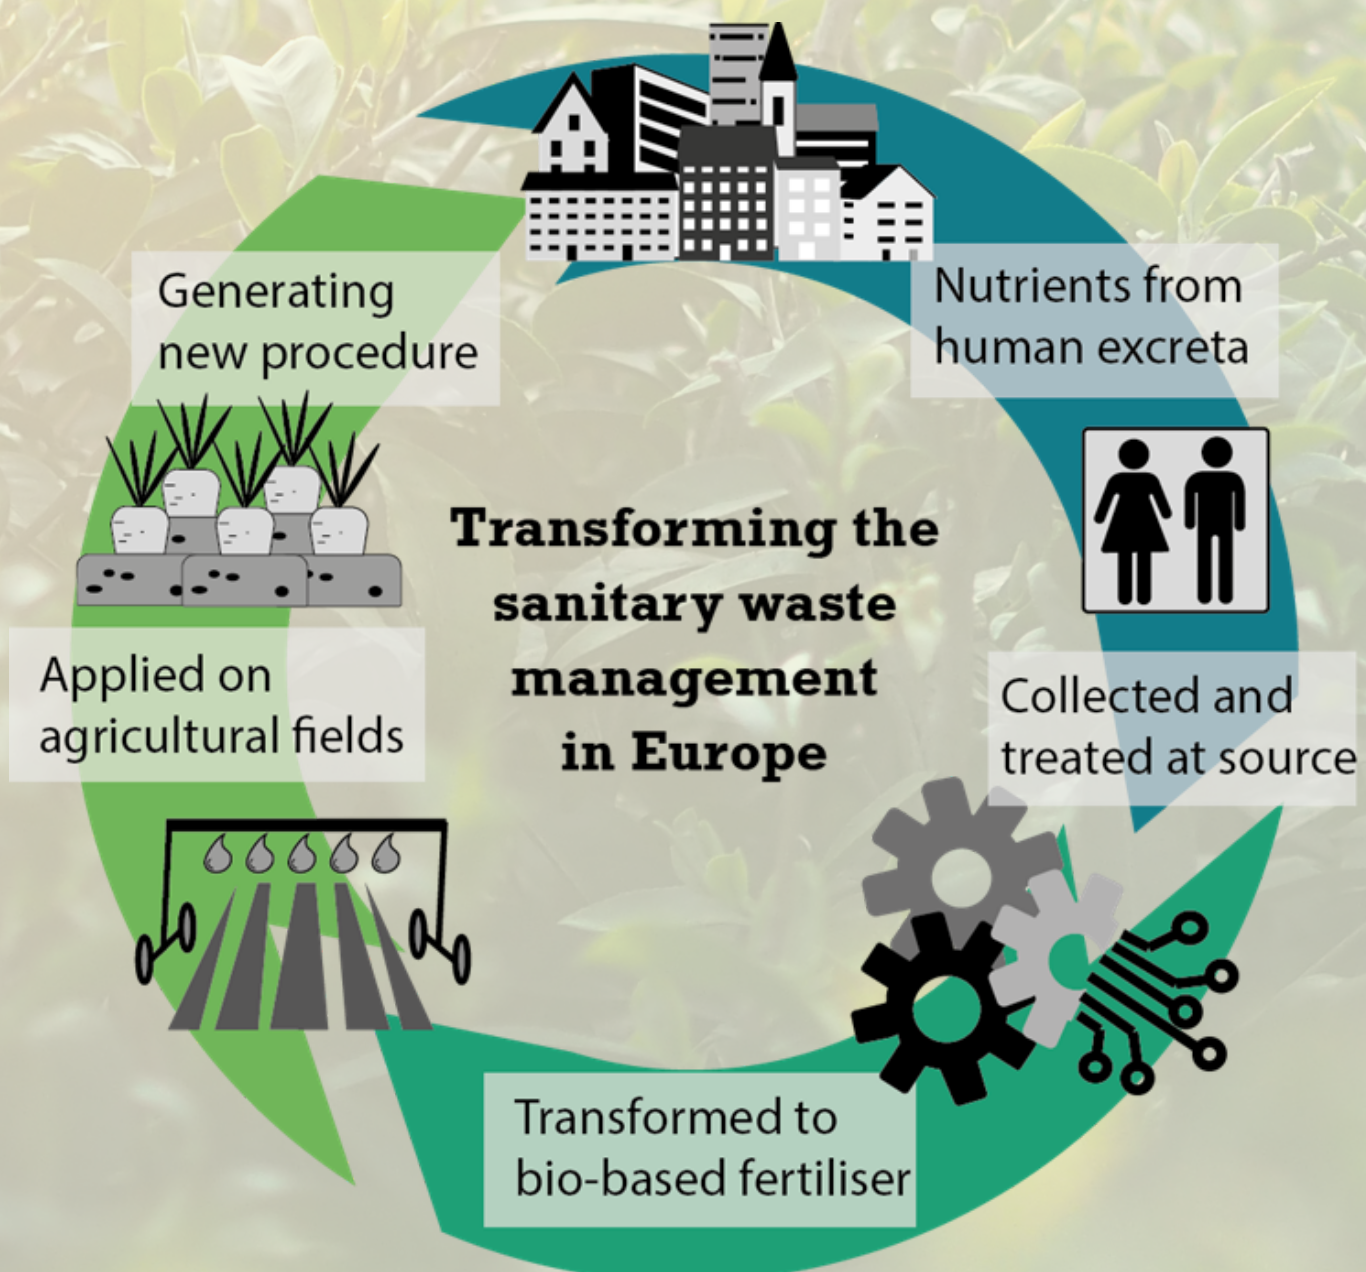

Funded by the European Union

P2GreenN's overall objective is to foster a paradigm shift, from a linearly organised resource and nutrient system within the agri-food supply chain, towards a circular material flow system between urban and rural areas thereby restoring the coupling of the water-agri-food system using a holistic symbiotic resource management approach following the 3R principle "Reduce, Reuse, Recover".

Our Vision

Our Mission

- 01 Blueprinting the regional clusters**
Test and demonstrate the N & P circular systems in the 3 pilot regions.
- 02 Monitoring & assessing the benefits**
Assess and validate the sustainability and impacts of the circular N & P systems demonstrated in the 3 pilot regions.
- 03 Supporting the transition**
Shaping the transition to innovative circular systems for the conversion of human sanitary waste into safe bio-based N & P fertilisers.
- 04 Building the governance framework**
Develop the P2GreenN cross-cutting governance framework.
- 05 Upscaling the impact**
Implement a series of actions that will allow P2GreenN's innovative and transformative circular solutions to be adopted and scaled within follower regions and across the EU.
- 06 Communication, Exploitation, Dissemination**
Raise awareness and promote P2GreenN's innovative governance solutions across Europe.
- 07 Project Management**
Ensure efficient and timely implementation of the project.
